User Manual

Strips Presence - Desk

Cleanliness

1. Clean State

When the desk has been cleaned previously, and the desk is vacant.... Strips will have a green LED blink every 10 seconds, and report "Clean State".

2. Occupied State

Once the desk is occupied, Strips will report "Occupied" and the LED will begin to blink red.

3. Dirty State

When the occupant leaves the desk, and Strips detects no presence for 30 minutes..Strips will enter "Dirty" State, and send report "Dirty"..... LED will continue to blink red.

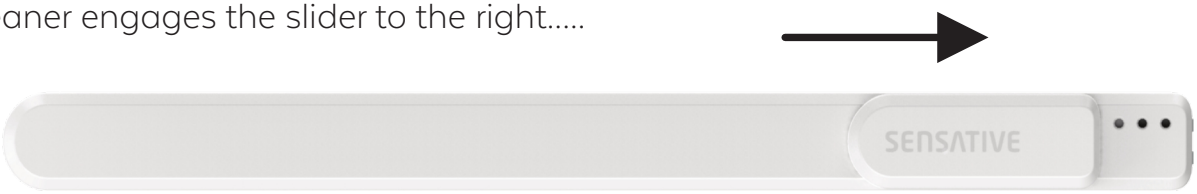

2. Cleaning State

Once a cleaner has reached the desk, and observe the red LED that indicates it is dirty.....

Cleaner engages the slider to the right.....

Then back to the left.....

This will trigger "Cleaning" mode, where the LED begins blinking orange, and sends the report "Cleaning", indicating the desk is being cleaned, this mode is active for 2 minutes, allowing ample time for the desk to be sanitized.

After the 2 minutes are over, Strips will send a report "Clean" and the clean state with green LED begin again.
